**Contract for General Services Administration (GSA)  
Awarded to Commercial Data Systems  
*CDS and Oracle to Implement Oracle Identity and Access Management Suite in GSA  
Enterprise Environment -***

**ALBUQUERQUE, NM – July 13, 2010** - Commercial Data Systems ( [www.cdsinc.com](http://www.cdsinc.com)), a leading IT integration company, has been awarded a contract to provide identity management software and hardware, and product support services for the General Services Administration (GSA). The award was made from CDS' BPA GS001-GS0118BPA with an estimated value of \$4.5 million. CDS and Oracle worked together to size a solution of Oracle Identity and Access Management 11g R1 software, with Oracle Sparc hardware, which aided GSA system integrators in launching the GSA Access Management System (GAMS). The primary project drivers included the Homeland Security Presidential Directive 12 (HSPD-12) and Federal Identity, Compliance and Access Management (FICAM) requirements, as well as GSA's IT modernization goals.

"We are honored to be part of such a distinguished team of professionals supporting the GSA on this groundbreaking identity and access management project," said Robb Converse, GSA Account Manager for CDS.

The GSA Access Management System is designed and developed to provide authentication, authorization, confidentiality, identity management, role-based access control, non-repudiation, segregation of duties, user account certifications, and other enterprise security services for the entire GSA user population (15,000-20,000 users), the GSA's Staff Service Office applications, and potentially other relevant Federal Government Communities of Interest. Currently, the GSA Access Management System is in the process of being developed and deployed across the GSA enterprise. The GSA Access Management System plans to be in production before the end of the 2010 Government Fiscal Year.

**About Commercial Data Systems, Inc.**

Founded in 1986, Commercial Data Systems, Inc. is an IT consultancy and systems integrator specializing in virtualization, HPC, Cross-Domain Solutions, applied technology and enterprise services. As a trusted advisor for government and commercial clients, CDS partners with many IT providers, including Oracle, HP and NetApp. The company specializes in the government, education and commercial markets throughout the U.S. and the Pacific Rim. In addition to product expertise, CDS offers a complete range of IT consulting, engineering, training, and support services. CDS was founded in Honolulu with a "mainland" headquarters in Albuquerque, NM.
